## **Issue #10: Results at time 0 don't match initial conditions**

### **Description**

I've noticed that results from 03rc3 don't match results from 0.2rc3 (same model, same integration parameters). Looking into this further I notice that in the INtegration Results page some of the variables at time =0 don't match their given initial values (listable in the Variables tab). Something seems a little screwy.

**Status: pending, Assigned\_to:**

### **Issuedata**

Classification: Bug , Topic: Numerical Integrator ,  
Importance: Medium
