

Edinburgh Pathway Editor

EPE 2.0

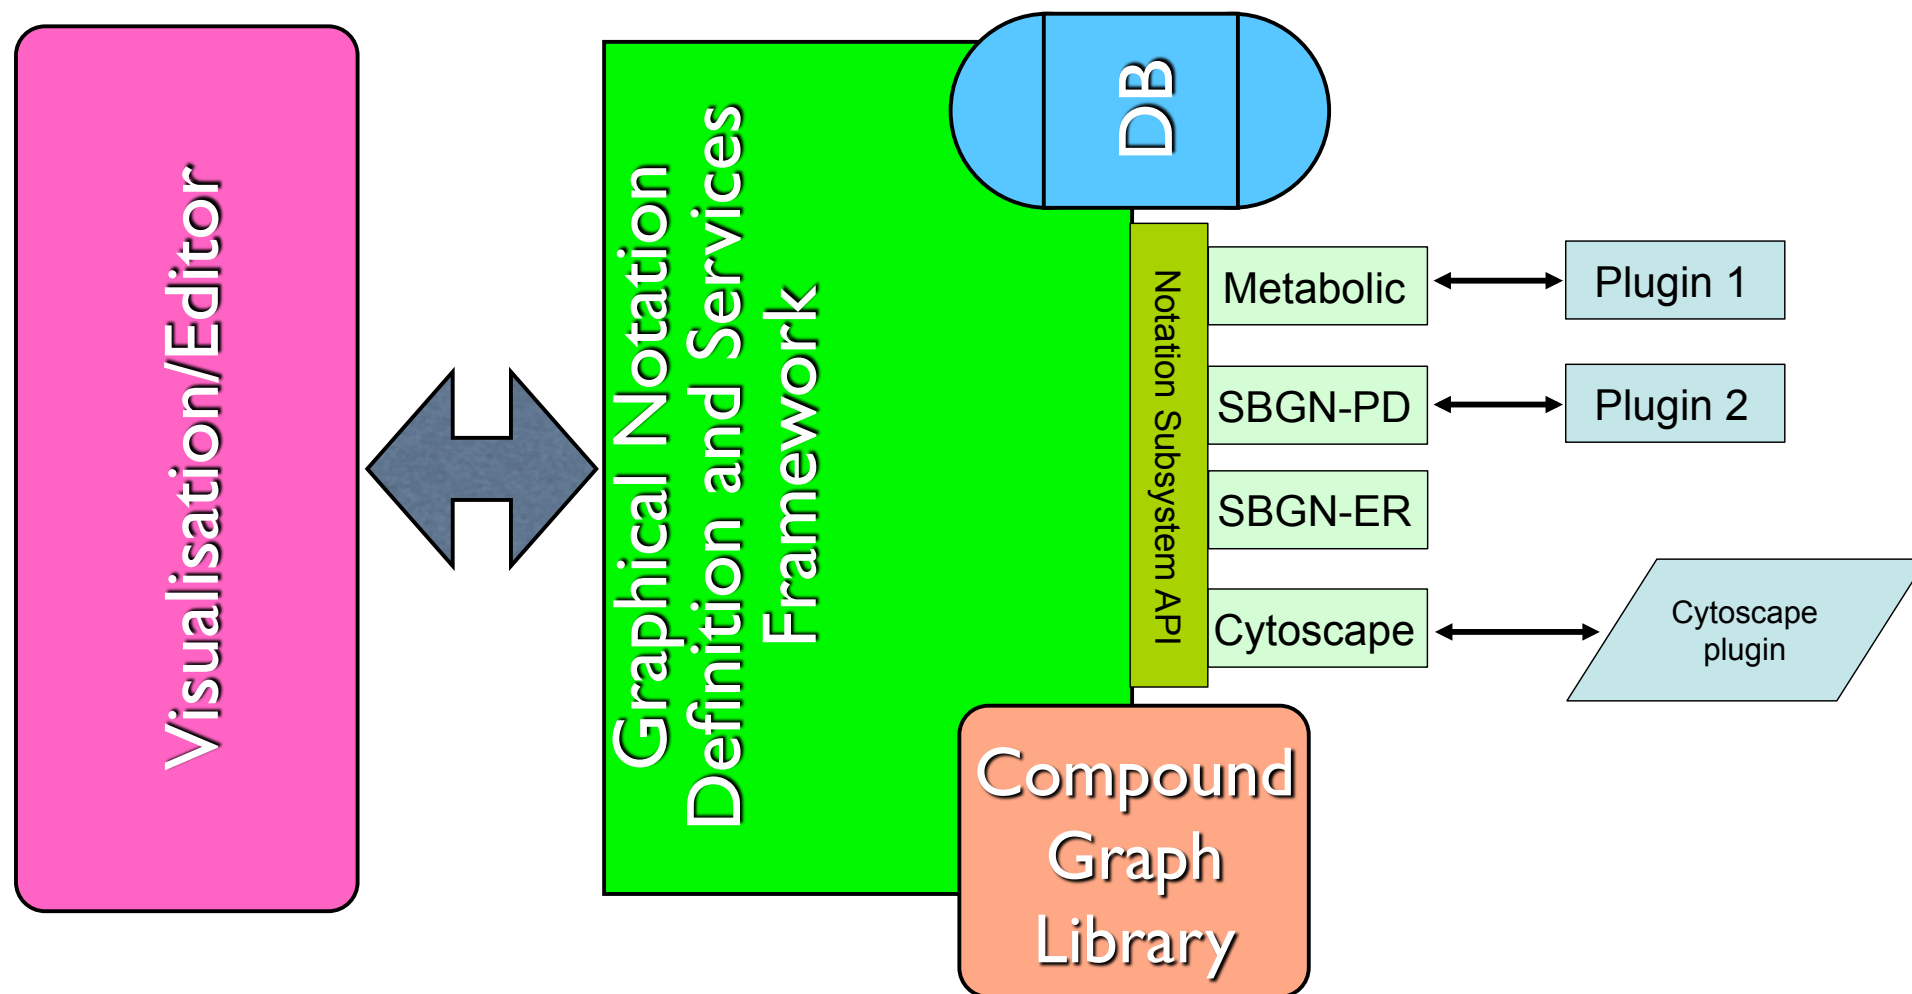

www.bioinformatics.ed.ac.uk/epe

History of EPE

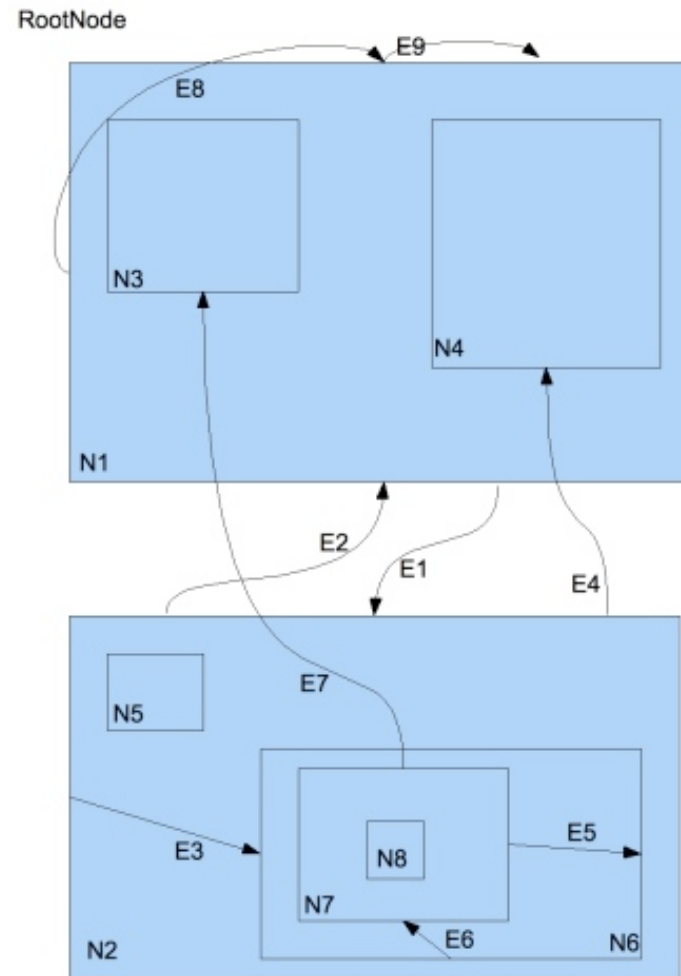

Demo of EPE 3.0

Visual Editor & SB Framework

Compound Graph Library

- Java 5+
- Uses Generics
- Extensible
- Copy
- Move
- Delete
- Selection
- Undo/Redo

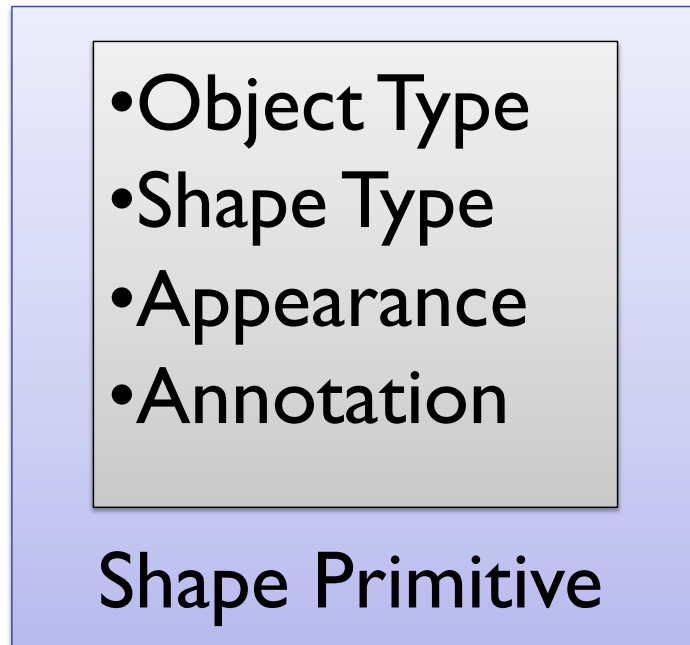

<http://sourceforge.net/projects/epe>

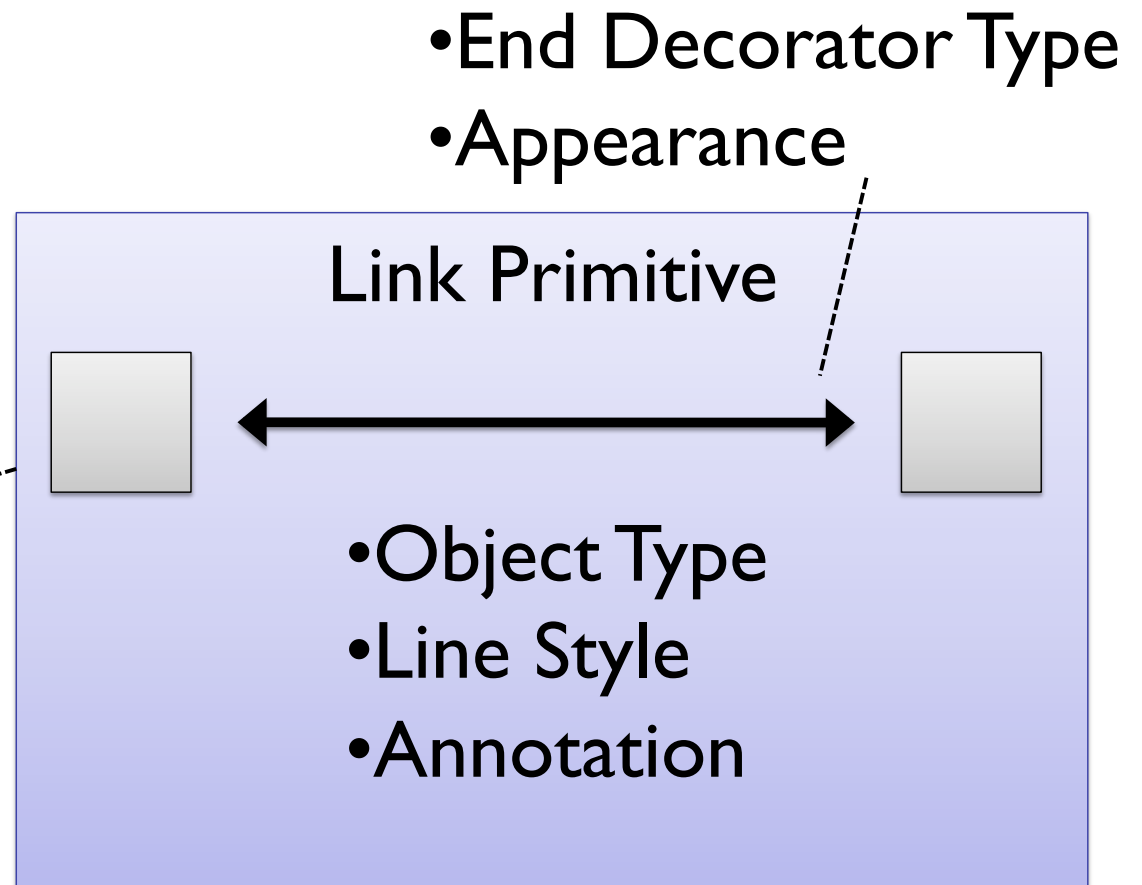

Notation Subsystem Services

- Notation definition
 - Glyphs
 - Notation Syntax
- Notation Validation
 - Notation semantics
 - Layout guidelines
- Notation DOM
 - API describing what the notation means
- Context conversion
 - To different notations
 - Upgrade to new version
- Autolayout
 - Notation specific layout rules
- Import/Export
 - Pathways from databases
 - From other applications

Drawing Primitives

- Terminus Dec Type
- Appearance
- Attributes

Object Types – Syntax Defn

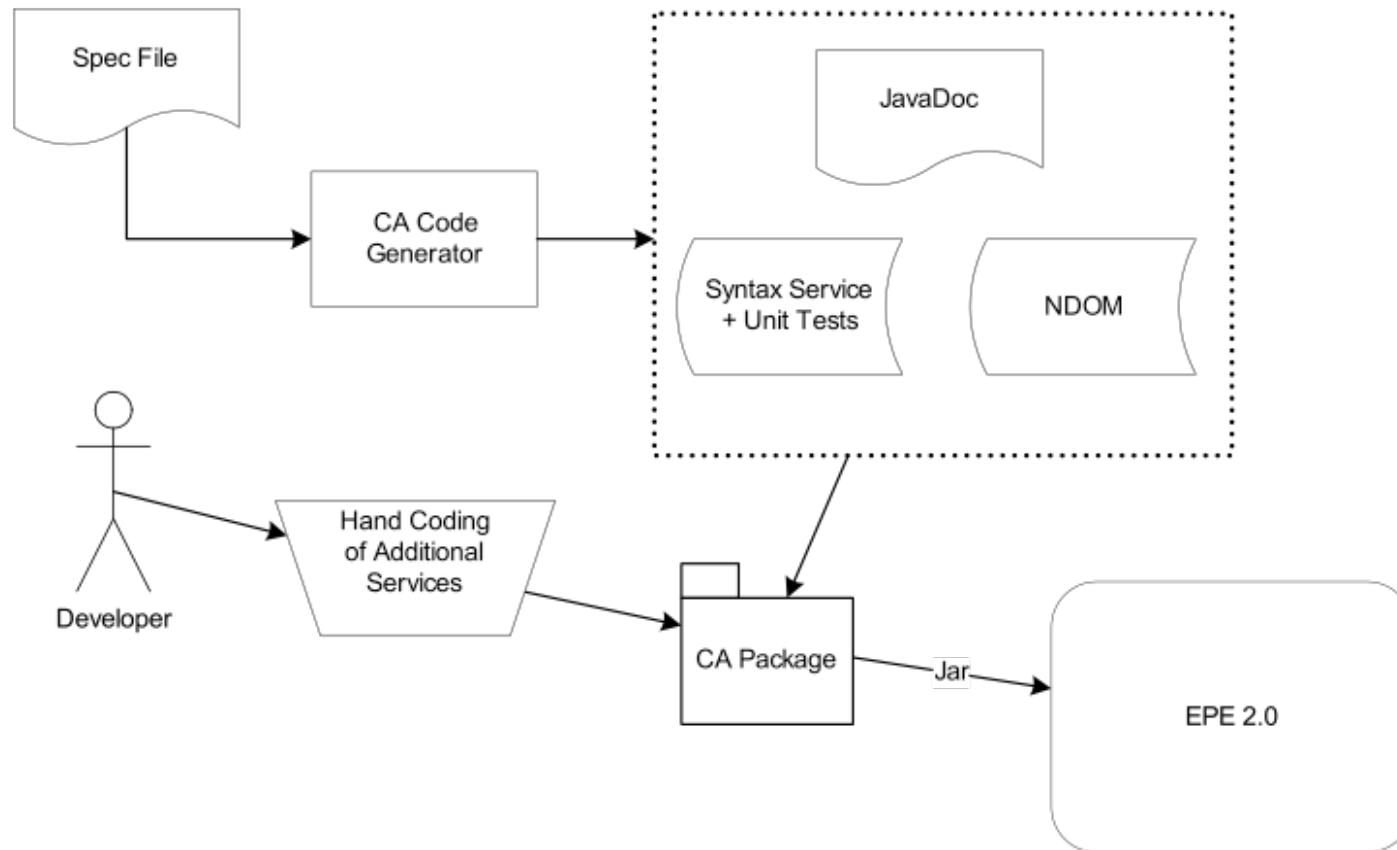

Shape Parenting

Parent	Shape OT A	Shape OT B	Shape OT C
Shape OT A	T	T	F
Shape OT B	F	T	F
Shape OT C	T	T	F

Link Connectivity

Connects to	Shape OT A	Shape OT B	Shape OT C
Link OT 1	S	T	-
Link OT 2	S	-	T
Link OT 3	S	S	T

Notation Subsystem Builder

Example Ca File

```

/**
 * Basic cytoscape notation subsystem
 */
context uk.ac.ed.inf.csb.BasicCytoscape (name = "Basic Cytoscape Context" descr="Context to test
code generation of a basic cytoscape" version=1.0.0)

property Interacts (name="interacts" descr="interaction between two nodes" type=simple
visualisable)

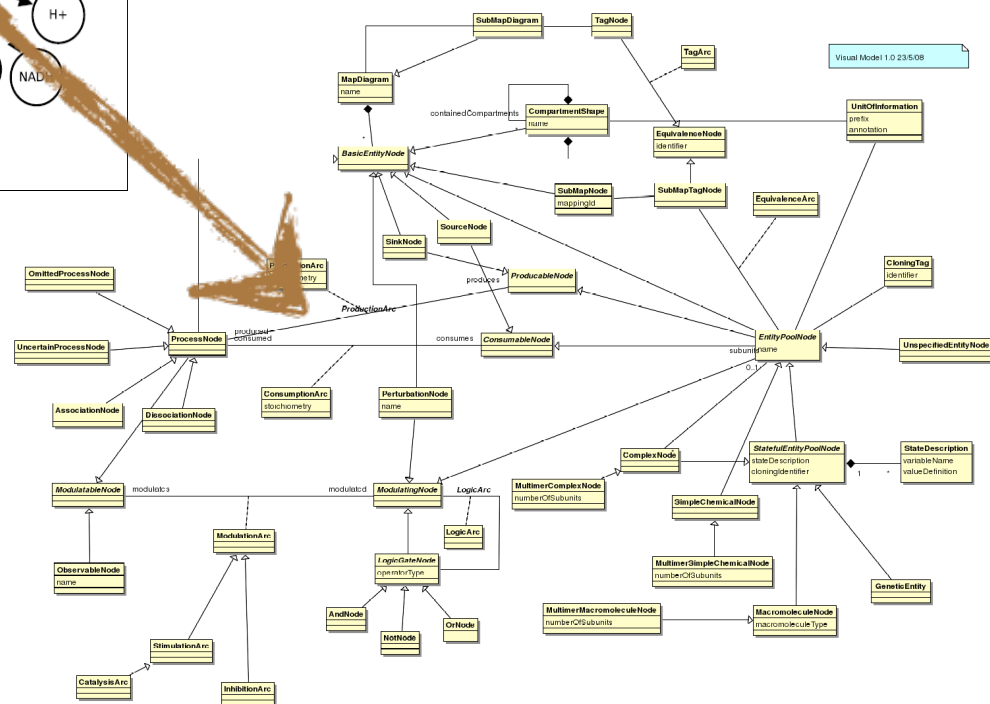

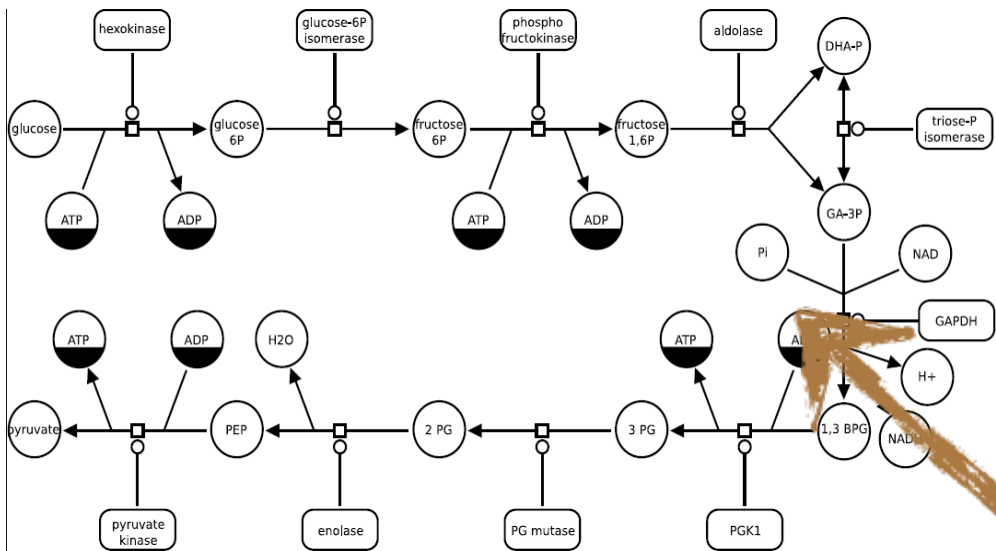

RMO      ( contains [Node])

shape    Node (name="Node" descr="node"
               stype = ELLIPSE
               size = [50,50]
               contains [])
)

link     Edge (name="Edge"
               lcolor = [0,0,0]
               Interacts=" "
               source = Node target = [Node]
               sport = NONE (stype = RECTANGLE
                             size = [0,0]
                             lcolor = [0,0,0]
                             fcolor = [255,255,255]
                           )
               tport = NONE (stype = RECTANGLE
                             offset = 0
                             size = [0,0]
                             lcolor = [0,0,0]
                             fcolor = [255,255,255]
                           )
               )
)

```

From Diagram to Meaning

Export/Import

- Metabolic to SBML, BioPAX L2
- Import & Export to Cytoscape XGMML

Future

- SBGN-PD to BioPAX L3
- Import SBML to SBGN-PD

SBGN In EPE

PD Example

Omissions

- Names do not overflow shape

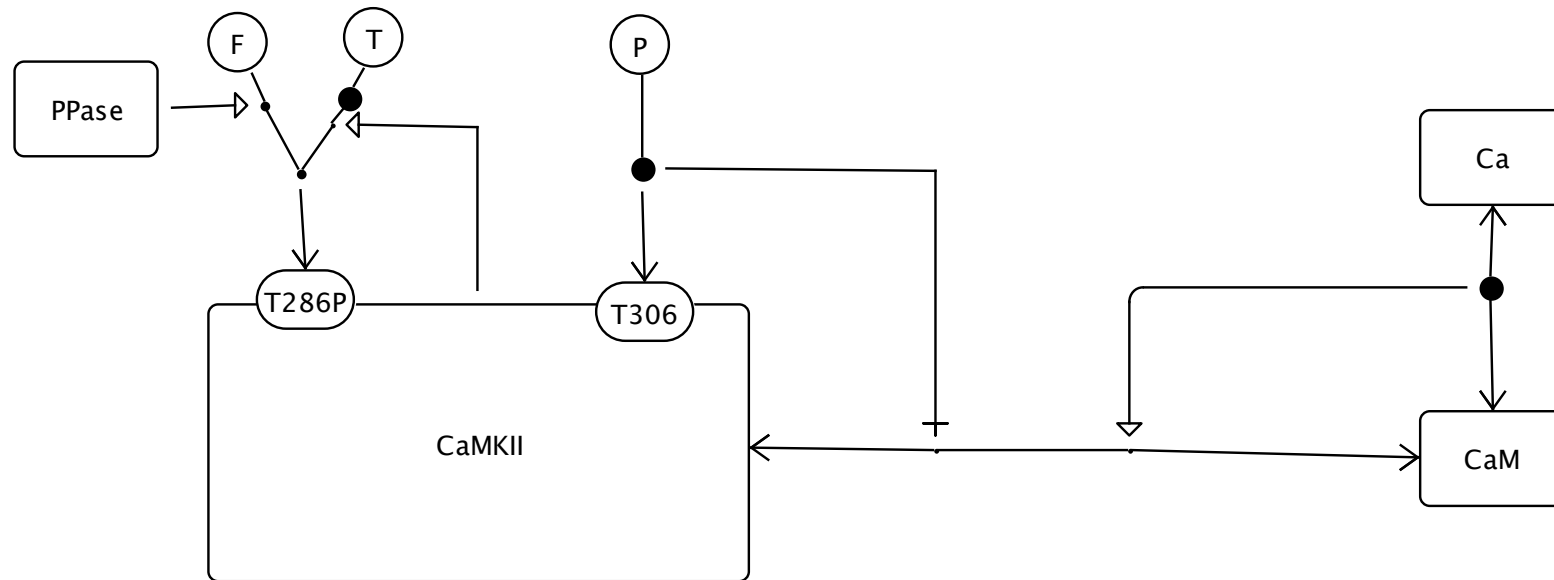

- Clone markers cumbersome

- Processes not correct

SBGN-ER

Future Directions

- Sort out process for SBGN
- On the fly decorator addition
- SVG shape definition
- Linking to Links
