# Introducing the CellML Editorial Board

# Our purpose:

“...we discussed the purpose of the CellML editorial board and all agreed that while there is certainly a role in the guardianship of the CellML specifications, we are also responsible for growing the CellML community. To this end, we agreed that it is best to focus immediate efforts on identifying any barriers preventing adoption of CellML. As such, the editorial board is embarking on a review of the CellML API and the CellML model repository in order to identify any existing issues and to provide guidance for future development of these projects.”

# The rest of today...

- An introduction to CellML
- Various software projects from around the world
- Closely related standardization projects
- Farewell (for now!) presentation from Catherine 😊
- 6:15pm ferry back to Auckland (and dinner if you're keen)

## ...tomorrow...

- 10am ferry from Auckland
- More related standardization projects
- Model repositories
- Potential and actual users!
- Annotation, annotation, annotation
- Don't forget Peter's talk!
- 6:15pm ferry back to Auckland

# Don't forget!

- Everything is broadcast on the internet...
- ...and recorded!
