
Meeting Minutes 24 February 2004

Autumn A Cuellar

- Autumn's update: Still working on new website.
- Catherine's update: Added keywords to all the CellML models; divided the repository index into categories; and put the material law models that Vijay wrote up on the website. Catherine's last day will be Friday, 27 February. She's leaving to do her PhD in the School of Biological Sciences. She'll continue coding CellML models for a few hours a week.
- Poul's update: Matt has proposed two 4th year software engineering projects. The first is one to extend the Content MathML Editor that Stephanie's been working on to include CellML (such as units). Can't remember the other proposed project. Still working on Road Map.
